Applicant argue in their response to the previous restriction requirement that the previous action analyzed the claims under the unity of invention rules and that because this is a divisional of a national stage application it should be analyzed under 35 USC § 121. The examiner agrees and therefore a new restriction under 35 USC § 121 follows.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 12-18, drawn to a nucleic acid of SEQ ID NO:5 or encoding SEQ ID NO:6, a vector containing the nucleic acid, a host cell containing the nucleic acid and a method of making an enzyme by using the host cell, classified in class 536, subclass 23.2.

II. Claims 12-18, drawn to a nucleic acid of SEQ ID NO:7 or encoding SEQ ID NO:8, a vector containing the nucleic acid, a host cell containing the nucleic acid and a method of making an enzyme by using the host cell, classified in class 536, subclass 23.2.

The nucleic acids of Groups I and II are structurally different products and are patentably distinct. It is noted that if claim 17 of either 09/988,200 or 09/988,202, limited to either SEQ ID NO:5 or 7, were added to the instant application, it would be allowed to remain in this application.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
